

Additional Requirements for Miscellaneous Products and Seating Systems

Only manufacturers are given an opportunity to submit their products for approval. Their products or activities in the miscellaneous category such as event related activities should be recognised and tested worldwide.

If the test results are positive, the manufacturer may be awarded a FIBA Study Centre Certificate.

The tests must meet the minimum FIBA requirements - as specified in the rules - for the specific product category. All tests performed are at the expense of the manufacturer.

"Tests successful":

The FIBA Research & Study Centre receives the appropriate Test results as issued by the Test Institute.

The FIBA Research & Study Centre reserves the right to send a representative to visit the manufacturing plant.

The FIBA Study Centre sends two (2) original Agreements to be checked. The Manufacturer returns the two (2) signed copies to the FIBA Research & Study Centre and settles the licence fee.

Upon receipt of payment, the manufacturer will be awarded a FIBA Study Centre Certificate.
